Ligature Resistant Metering Faucet SF380

Our new patented metering faucet's ligature resistant profile is patterned after our popular sensor faucet, but now includes the patient having the option of hot or cold water. Duration of flow can be adjusted to change run time depending on each environmental condition. With no batteries or electronics, maintenance on this unit has been drastically reduced. Hot and cold buttons are color coded and incorporate braille. All metal construction designed for maximum strength and protection from abuse. Polished chrome finish.

Ligature Resistant Sensor Faucet SF370

Our patented Infrared Sensor Faucet is sloped and rounded making the design ligature resistant. The touch-less design prevents any infection control issues regarding the faucet. Designed to retrofit existing lavatories or for new construction. Available in AC or DC setup. All metal construction designed for maximum strength and protection from abuse. Polished chrome finish. ADA compliant.

Ligature Resistant TV Enclosure TE540

These TV enclosures are designed to be mounted around a previously mounted TV. They are available for screens from 19" to 80", and custom sizes are available. Constructed from strong aluminum extrusion and Lexan with a black anodized frame and black matte acrylic. The screen cover is 1/4" Lexan to withstand high abuse. Rounded corners, rounded edges, and sloped top provide for an aesthetically pleasing appearance, as well as crucial safety features.

Ligature Resistant Shower Valve Handle & Escutcheon Plate SV230

Features easy grip, ligature resistant handle that meets ADA pull force requirements, and does not require pinch and grasp to turn, anti-friction ring maintains tight fit with smooth handle operation, redundant sealing to prevent moisture migration, escutcheon plate and handle with variable rough-in, anti-scald mechanism, ASSE 1016 & UPC approved shower valve and ADA compliant. All metal construction designed for maximum strength and protection from abuse. Polished chrome finish.

Ligature Resistant Lavatory ET720

The new BSP engineered sink is fashioned to meet the latest behavioral standards of ligature and aesthetic design. It easily replaces other sinks (or can be used in new installations) and is designed to support additional weight by interlocking our companion trap cover with the sink. Accepts all standard faucets and our patented BSP faucets. Available in a number of standard solid surface popular colors.

NEW!

Ligature Resistant Stainless Steel Framed Mirror FM160

Our polished stainless steel framed mirror incorporates the same ligature resistant frame design as our art frame. It is backed with .375" MDF making it extremely durable. Because of the warmth of the wooden frame, the mirror itself shows more like a standard glass mirror, as opposed to stainless steel, giving the patient a more homelike environment. Currently available in 18"x24" (mirror size), and four frame colors.

Ligature Resistant Integrated Door Lever and Escutcheon (Mortise) DH510

This unique mortise door latch integrates the lever handle and escutcheon, creating a superior design that is safe, easy to use, and aesthetically pleasing. Seamless and cohesive sliding action of the lever handle and thumb turn housed within their escutcheons eliminates "tie off points" associated with normal door handles. Available in 36 functions, Grade 1, UL Listed, ADA Compliant, and Patent Pending.

Ligature Resistant Lever Handle (Cylindrical) DH410

Features bidirectional lever handles that rotate up or down to allow slippage of any ligature device in an attempt to tie or wrap over the top or under the bottom of the lever. The escutcheon and lever handle is constructed of solid stainless steel, with a satin stainless steel finish. Available in lockable cylindrical or mortise.

Suicide Resistant Furniture

Our full line of suicide/impact resistant polymer and hardwood furniture features: radiused edges, ultraviolet stabilizers to reduce fading, chemically resistant to blood, vinegar, urine, feces, salt solution or chlorine solution, Dura-Ply™ construction, SafeJoint™ concealed joinery for added strength, manufactured in the USA to ISO Quality Standards, stain resistant and easy to clean, can be bolted down, most ship assembled, comes with a 5-year warranty, flame retardant, passing Cal 133. Color coordinating and matching available on our website.

Behavioral Safety Products designs, develops, and manufactures ligature resistant products that are technically sound and aesthetically pleasing. We not only supply, but provide engineering input, product support, and field experience to assist behavioral health facilities, emphasizing ethics and professionalism and furnishing sound technical advice reflecting over 41 years of field experience. Our goal is to provide rapid access to critical products as facilities face steady increases in patient acuity and greater difficulty in patient monitoring, relying on guidelines and input from The Joint Commission.

Suicide Preventative Over the Door Alarm DH550

The Door Switch is an over-the-door patented pressure sensitive alarm, for inpatient behavioral healthcare facilities, that helps warn off sentinel event suicides. If a patient attempts to loop anything over the door in an effort to hang or asphyxiate themselves, The Door Switch system will notify the staff of a suicide attempt.

Ligature Resistant Exhaust/Supply Grille EG450

Designed to replace non-ligature resistant grilles. Manufactured with 11 gauge aluminum, it features a 1/8" thick perforated face with 1/8" holes on staggered centers. The unit has 40% free air and can be ordered in custom sizes. The offset feature of the face allows it to be oversized to produce the same airflow as your existing grille. Surface mounting with no interior flanges makes it an easy installation over existing openings without alteration. Powder coated white finish. Corners and edges are radiused for safety.

Ligature Resistant Flush Valve Cover FV600

This one-piece unit has a fixed width, and can simply be offset to the opposite side of the lever handle. The bottom can be left intact and mounted at existing height, or cut off and inserted inside the top portion for height adjustment. The back can also be cut off for depth adjustment. Complete with angle bracket, security screws, and filler patch for lever handle cut out. White, high impact, abuse-resistant, heavy gauge material.
