

Suicide is the **10th** leading cause of death
and is one of three causes that is on the rise.

“In **70%** of inpatient suicides the
method was a **hanging** in a
bathroom, bedroom, shower or closet.”

Life More Secure.

The Door Switch™ is a patented over-the-door pressure sensitive alarm for your behavioral healthcare facility.

New Construction and Retrofit Solution for your Patient and Bathroom Doors!

Strobe light placed above room door gives quick visual location. Lens color option - Amber, Blue, Green and Red.

Keyswitch at monitored patient room assures patient safety. Used to deactivate and reset the audible alarm. Available without cylinder and housing to accept most key systems.

The Door Switch™ works in conjunction with continuous hinges, pivots, and double swing hinges with emergency release stops.

BASIC MONITORING PANEL FEATURES

All wiring and alarm input/output devices are supervised to warn of tampering.

48 double door, 96 single door rooms available on a single basic panel (additional components required).

Keypad console audible indicator and two-line, 32 character LCD display alerts an alarm condition or system trouble at nurses' station.

Control panel provides an event log (history log) that can store up to 512 events (time of event, response time and reset time). Logged events can be viewed on keypad console.

Keypad or laptop programmable.

Keypad "beep" walk test feature performed without triggering sirens and strobes.

Independently controlled notification devices (sirens) can be stationed in wings, floors and/or other designated areas of a facility.

All system components are electronically supervised and will notify if maintenance is required. Monitored doors can be isolated from the system during maintenance.

Example of Basic Monitoring Keypad Console
