

BEHAVIORAL SAFETY

INNOVATION NEVER RESTS

LIGATURE RESISTANT TOILET PAPER DISPENSER

#TR230

The patented TR230 Ligature Resistant Toilet Paper Dispenser is ideal for patient bathrooms and public areas in behavioral healthcare settings that require ligature-resistant products. Providing behavioral patients with our modern, Ligature Resistant Toilet Paper Dispenser can help to ensure that your facility remains a little bit cleaner and safe.

The TR230 Ligature Resistant Toilet Paper Dispenser is a surface-mounted, center-pull dispenser that fully encapsulates a single toilet paper roll. The entire unit is made of a 1/8" polycarbonate for abuse resistance, locks with a barrel lock for tamper resistance, and ease of maintenance. The front of the unit is a frosted polycarbonate with a transparent viewing window. The ligature-resistant outlet of the dispenser allows patients to tear toilet paper sheets cleanly. This feature can minimize waste, help prevent excessive use of toilet paper, and the stashing of contraband.

Unlike most toilet paper holders, the TR230 is surface-mounted, significantly reducing installation time. The TR230 dispenser can hold most toilet paper rolls and is excellent for ADA bathrooms that require an open & spacious area.

When installed, the outer flange of the dispenser fits snugly against the wall and, when mounted with pick-free resistant caulk, also discourages ligature. The TR230 dispenser includes mounting hardware and can be retrofitted to existing rooms or installed in new facilities.

Note: *Most toilet paper rolls may be suitable if they meet size requirements. The TR230 accepts standard or jumbo rolls up to 5 inches in diameter.*

Specifications

- Patented ligature resistant design
- Viewing window to the interior for staff inspection of the paper roll
- Accepts toilet paper rolls with up to 5" diameter
- Constructed of 1/8" polycarbonate for strength
- Locks with a barrel lock and circular key for tamper resistance and ease of maintenance
- Meets ADA standards when installed per manufacturer's instructions
- Comes with tamper-resistant mounting hardware to attach it to the wall in either new or existing buildings
