

## LIGATURE RESISTANT GRIEVANCE BOX & LOCK BOX

#LB130

The new LB130 Ligature-Resistant Grievance Box & Lock Box is a multi-use lock box. Not only can it be used by facility staff to lock away items such as Ipads and clipboards, but it also allows patients to submit their concerns, praises, and grievances to facility staff while maintaining a safe environment.

The LB130's dimensions allow a wide array of items of varying sizes to be stowed.

The LB130 is constructed of 14 gauge steel for abuse resistance and is locked with a barrel lock and circular key for tamper resistance. Mounting hardware, as well as the circular keys, are included with the LB130.

The LB130 should be mounted flush to the wall with provided tamper-resistant screws and the perimeter caulked with pick-free caulk (not included).

The LB130 should be mounted in common areas near nursing stations.

### Specifications

- Overall dimensions (H" x W" x D") - 12.2" x 11.925 x 2.738"
