

BEHAVIORAL SAFETY

INNOVATION NEVER RESTS

LIGATURE RESISTANT UNIVERSAL WALL FIXTURE COVER

#TM265

Our patented TM265 Ligature-Resistant Universal Wall Fixture Cover is designed to maintain secure conditions in behavioral hospital settings where ligature resistance is a concern. The TM265 provides a face and function that the behavioral industry has not yet offered.

We designed the TM265 Universal Wall Fixture Cover with a clean, modern aesthetic featuring sloped faces and sides to minimize ligature points. The new TM265 is like our TM260 Ligature Resistant Thermostat Cover but has a larger footprint to cover larger wall fixtures. The specially designed air circulation openings allow unrestricted airflow while ensuring resistance to possible ligature. When installed with the included hardware and lined with pick-free caulk, the unit's base fits snugly against the wall and discourages ligature.

Constructed of 1/8" polycarbonate for abuse resistance, the TM265 has barrel locks and a circular key for tamper resistance yet ease of access for healthcare staff. The TM265 can cover wall fixtures requiring security, such as electrical outlets, cable connections, O2 connections, light switches, and electrical or HVAC control, and can be mounted either vertically or horizontally.

The TM265 unit includes mounting hardware and can be retrofitted to existing rooms or installed in new facilities.

Behavioral Safety Products' fixtures are thoughtfully designed and engineered per the behavioral industry's highest quality materials and performance standards.

Specifications:

- Patented design
- Sloped faces to prevent ligature points
- Constructed of 1/8" impact resistant polycarbonate for abuse resistance
- Locks with two barrel locks and circular key for tamper resistance, and ease of maintenance
- Comes with mounting hardware to attach it to the wall in either new or existing buildings.
- Sized to fit various wall fixtures
- Can be mounted vertically or horizontally
