

LIGATURE RESISTANT SMALL LOCK BOX

#LB120

The new LB120 Ligature-Resistant Lock Box allows faculty to safely and securely stow items (i.e., remotes, writing utensils, etc.) out of reach from the hands of patients.

The LB120 is constructed of 14 gauge steel for abuse resistance and is locked with a barrel lock and circular key for tamper resistance. Mounting hardware, as well as the circular keys, are included with the LB120. The LB120 should be mounted flush to the wall using the provided screws.

The LB120 should be mounted flush to the wall with the provided tamper-resistant screws and the perimeter caulked with pick-free caulk (not included).

The LB120 can be used in dining areas, common areas, inpatient rooms, multi-use rooms, and lobbies.
