

BEHAVIORAL SAFETY

INNOVATION NEVER RESTS

LIGATURE RESISTANT PAPER TOWEL DISPENSER

#PH235

The patented PH235 Ligature Resistant Paper Towel Dispenser is ideal for patient bathrooms and public areas in behavioral healthcare settings that require ligature-resistant products. Providing behavioral patients with our modern, Ligature Resistant Paper Towel Dispenser can help to ensure that your facility remains a little bit cleaner and safe.

While the old, recessed "shelf style" paper towel holders have had their purpose and merit, they can create an unsanitary environment whereby patients can remove the entire supply of paper towels at one time. This ease of access to the whole paper towel supply presents a much greater risk of a patient using the paper towels to stop toilets or litter the bathroom.

The PH235 Ligature Resistant Paper Towel Holder is a new edition to Behavioral Safety. The PH235 can hold up 6.5" diameter x 8.5" tall "center pull" paper towel rolls and is excellent for ADA bathrooms that require an open & spacious area. The PH235 fully encapsulates a paper towel roll which ensures sanitary use. The unit is surface-mounted, significantly reducing installation time. The unit comprises a 1/8 inch polycarbonate frosted front cover and transparent viewing window for staff inspection. The conical, ligature-resistant outlet of the dispenser allows patients to tear paper towels cleanly. This feature can minimize waste and helps prevent the stashing of contraband. The PH235 dispenser includes mounting hardware and can be retrofitted to existing rooms or installed in new facilities.

Compatible Paper Towel Rolls

- U-Line EzPull Junior S-13796
- Medline NON26836
- Boardwalk BWK6405

Other towels may be suitable if they meet size requirements.

- Shipping weight 5 lbs.
